Information Processing Letters 30 (1989) 311–312
North-Holland

28 March 1989

AUTHOR INDEX VOLUME 30 (1989)

(The issue number is given in front of the page number)

Aggarwal, A., D. Coppersmith and **D. Kleitman**, A generalized model for understanding evasive-ness (4) 205–208
Ariyawansa, K.A., *see* **Nazareth, J.L.** (6) 277–281

Barkley, R.E. and **T.P. Lee**, Point representation and hashing of an interval (4) 201–203

Chakrabarti, P.P., S. Ghose, A. Pandey and **S.C. De Sarkar**, Increasing search efficiency using multiple heuristics (1) 33– 36
Chetto, H. and **M. Chetto**, Scheduling periodic and sporadic tasks in a real-time system (4) 177–184
Chetto, M., *see* **Chetto, H.** (4) 177–184
Ch'ng, H.T., B. Srinivasan and **B.C. Ooi**, Study of selforganizing heuristics for skewed access patterns (5) 237–244
Consel, C. and **O. Danvy**, Partial evaluation of pattern matching in strings (2) 79– 86
Coppersmith, D., *see* **Aggarwal, A.** (4) 205–208
Culberson, J.C. and **P. Rudnicki**, A fast algorithm for constructing trees from distance matrices (4) 215–220
Culik II, K., Variations of the firing squad problem and applications (3) 153–157

Danvey, O., *see* **Consel, C.** (2) 79– 86
Darondeau, P., Bisimulation and effectiveness (1) 19– 20
De Sarkar, S.C., *see* **Chakrabarti, P.P.** (1) 33– 36

Ehlers, E.M. and **S.H. von Solms**, Using random context structures grammars to represent chemical structures (3) 159–166
Emde Boas, P. van, Space measures for storage modification machines (2) 103–110

Fleischer, R., Communication complexity of multi-processor systems (2) 57– 65
Foster, M.J. and **R.I. Greenberg**, Lower bounds on the area of finite-state machines (1) 1– 7

Galil, Z. and **V. Pan**, Parallel evaluation of the determinant and of the inverse of a matrix (1) 41– 45
Garzon, M., *see* **Zalcstein, Y.** (5) 253–254
Geréb-Straus, M., R. Paturi and **E. Szemerédi**, There are no p-complete families of symmetric Boolean functions (1) 47– 49

Gerstel, O., Y. Mansour and **S. Zaks**, Bit complexity of order statistics on a distributed star network (3) 127–132
Ghose, S., *see* **Chakrabarti, P.P.** (1) 33– 36
Ghosh, R.K., *see* **Rajan, V.** (5) 265–268
Greenberg, R.I., *see* **Foster, M.J.** (1) 1– 7
Greibach, S.A., *see* **Rolim, J.D.P.** (3) 133–138
Gupta, P., *see* **Rajan, V.** (5) 265–268
Gusfield, D. and **R.W. Irving**, Parametric stable marriage and minimum cuts (5) 255–259
Gusfield, D., *see* **Martel, C.U.** (2) 97–102

Hehner, E.C.R., Real-time programming (1) 51– 56

Ibarra, O.H. and **T. Jiang**, Optimal simulation of tree arrays by linear arrays (6) 295–302
Irving, R.W., *see* **Gusfield, D.** (5) 255–259
Itoh, T. and **S. Tsujii**, An efficient algorithm for deciding quadratic residuosity in finite fields GF(p^m) (3) 111–114

Jiang, T., *see* **Ibarra, O.H.** (6) 295–302
Jokinen, M.O., Customizable garbage collectors (3) 115–118

Karpinski, M., *see* **Lingas, A.** (1) 27– 32
Kelter, U., The pitfall paradox and its solution with virtual objects (3) 139–143
Kim, J.H., K.H. Park and **M. Kim**, A model of distributed control: dependency and uncertainty (2) 73– 77
Kim, M., *see* **Kim J.H.** (2) 73– 77
Kim, M., *see* **Song, G.** (5) 245–252
Kleitman, D., *see* **Aggarwal, A.** (4) 205–208
Kučera, L., Graphs with small chromatic numbers are easy to color (5) 233–236

Lavault, C., Average number of messages for distributed leader-finding in rings of processors (4) 167–176
Lee, D., *see* **Song, G.** (5) 245–252
Lee, T.P., *see* **Barkley, R.E.** (4) 201–203
Lindhorst, G. and **F. Shahrokhi**, On renaming a set of clauses as a Horn set (6) 289–293
Lingas, A. and **M. Karpinski**, Subtree isomorphism is NC reducible to bipartite perfect matching (1) 27– 32

0020-0190/89/$3.50 © 1989, Elsevier Science Publishers B.V. (North-Holland)

Luca, A. de and **S. Varricchio**, Factorial languages whose growth function is quadratically upper bounded. (6) 283–288

Mansour, Y., *see* **Gerstel, O.** (3) 127–132
Martel, C.U. and **D. Gusfield**, A fast parallel quicksort algorithm (2) 97–102
